

Hooli Ventures — IT & Infrastructure Policy

Version 2.4 | IT Governance Office | Reviewed: Q4 2024

1. IT Governance & Oversight

Hooli Ventures's IT function is led by the Chief Information Officer (CIO) and operates under an IT Governance Committee that meets monthly. The committee includes the CIO, CISO, CTO, CFO representative, and business unit heads. IT strategy is aligned with the company's 3-year business roadmap.

- IT budget for FY2024: \$8.4M (5.9% of revenue), up 18% YoY.
- Headcount: 42 FTE in IT (28 internal, 14 managed service staff).
- Primary framework: NIST Cybersecurity Framework + ISO 27001 alignment.
- Annual external IT audit and penetration testing by accredited third parties.

2. Cloud Infrastructure

Hooli Ventures operates a cloud-first infrastructure strategy. 92% of workloads are hosted on public cloud platforms as of Q4 2024, with the remaining 8% in a co-located data centre for legacy systems scheduled for migration by Q2 2025.

Platform	Primary Use Cases	Regions	Monthly Spend
AWS (Primary)	Production workloads, data lake, ML training	us-east-1, ap-south-1	\$142,000
Azure	Microsoft 365, Azure AD, DevOps pipeline	East US, West Europe	\$38,000
GCP	BigQuery analytics, Vertex AI experiments	us-central1	\$22,000
Cloudflare	CDN, WAF, DDoS protection, DNS	Global edge	\$8,500

3. Information Security Policy

Information security at Hooli Ventures is governed by the Information Security Management System (ISMS). All employees must complete annual security awareness training. The following controls are mandatory:

- Multi-Factor Authentication (MFA) on all corporate accounts — no exceptions.
- Endpoint Detection & Response (EDR) agent on all managed devices.
- Full-disk encryption (BitLocker / FileVault) on all laptops.
- VPN required for any access to internal systems from external networks.
- Password policy: minimum 14 characters, no reuse of last 12, rotated every 90 days.
- All data classified as 'Restricted' or above must be encrypted at rest and in transit.
- Incident response SLA: P1 (Critical) — 1-hour acknowledgement, 4-hour containment.

4. Device Management & BYOD Policy

All company-issued devices are enrolled in Mobile Device Management (MDM) and subject to remote wipe capabilities. BYOD (personal devices) are permitted only for email and calendar access via managed apps. BYOD devices must not access internal source code repositories, customer data, or internal file stores.

Device Type	Provisioned By	MDM Enrolled	Refresh Cycle
MacBook Pro 14" / 16"	IT (Senior Engineers)	Yes — Jamf Pro	3 years
MacBook Air M2	IT (General Staff)	Yes — Jamf Pro	3 years
Windows Laptop (Dell)	IT (Finance/Ops)	Yes — Intune	3 years
iPhone 14 / 15	IT (Manager+)	Yes — Jamf	2 years
Android (Samsung)	IT (optional)	Yes — Intune	2 years
BYOD (personal)	Employee-owned	Managed App only	N/A

5. Software & SaaS Stack

Category	Tool / Platform	Owner	Licence Model
Collaboration	Slack, Zoom, Google Workspace	IT	Per seat
Project Management	Jira, Confluence, Notion	Engineering / PMO	Per seat
CRM	Salesforce Sales Cloud	Sales Ops	Per seat
HRIS	Workday	HR	Headcount-based
ERP / Finance	NetSuite	Finance	Module-based
Source Control	GitHub Enterprise	Engineering	Per seat
CI/CD	GitHub Actions, ArgoCD	Engineering	Compute-based
Observability	Datadog (APM + Logs)	SRE	Per host + logs
Security	CrowdStrike, Wiz, 1Password	IT Security	Per seat / host
Data & Analytics	Snowflake, dbt, Looker	Data Team	Credit + seat

6. Business Continuity & Disaster Recovery

Hooli Ventures maintains a Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP) reviewed annually. Critical systems have the following targets:

- RTO (Recovery Time Objective) — Production systems: 4 hours.
- RPO (Recovery Point Objective) — Production databases: 1 hour.
- DR failover site: AWS us-west-2 (active-passive configuration).
- Full DR test drill conducted every 6 months. Last drill: September 2024 — PASSED.
- Backup retention: Daily for 30 days, Weekly for 12 weeks, Monthly for 12 months.
